# Alturas Analytics, Inc.

The LC/MS Experts™

Founded in 2000, Alturas Analytics was launched by a core team of bioanalytical experts driven to create a premier contract research organization (CRO) focused on LC-MS/MS bioanalysis. The team made a commitment to unmatched quality science and excellent customer service with shorter timelines that they still uphold today.

Alturas is a privately owned and operated company, and greatly enjoys the freedom this provides to focus on fostering strong and lasting relationships with our sponsors while retaining the flexibility needed to accommodate their unique needs as they arise.

[Our location](#) in the pacific northwest affords us many luxuries and a quality of life that are hard to come by elsewhere, and our close proximity to two major research universities, major highways and interstate thoroughfares in combination with two local, dedicated airports keep Alturas well connected to the rest of the world.

[Alturas Analytics Bios](#) of Dr. Needham, Laboratory Director and Co-Founder and Robin Woods, President and Co-Founder, [Newest News Release](#), [Additional ALICE Info](#), [Selection of Logos](#), [Images](#), [Publications](#), [Video](#), and [Contact Information](#) can be found here.
