

Virtual Realities: Hosting Remote Audits (including the FDA) in a Post-COVID World

Presented by David Schumacher, RQAP-GLP

As the COVID-19 pandemic spread across the USA in early 2020, many facilities had to reduce operations, preventing auditors from traveling to customer sites. Alturas Analytics developed processes to permit auditors to conduct their inspections remotely. Additionally, Alturas Analytics was one of the first companies to be inspected remotely by the FDA in April. This presentation will present tips for a simple and positive remote audit experience and describe the process employed by the FDA to successfully complete a remote regulatory inspection.
